

APPENDIX M: SEVERE PREECLAMPSIA/ECLAMPSIA IN LDR V2.0 SimMan 3G: Debriefing Guide/Evaluation

Part 7 Debriefing Guide/Evaluation – Make notes & time of notable behavior for use during video debriefing

<p>Shared Mental Model/SBAR</p> <ol style="list-style-type: none"> 1. Nurse to team responding to call for help <ol style="list-style-type: none"> a. Are all elements present? b. What elements are missing, why? 2. Did the responding team “receive” the report? <ol style="list-style-type: none"> a. Report given only to physician? b. Team doing other tasks and not listening? c. Team leader gather team for report? 3. Report given to team members who arrive later? 4. Does physician give SBAR back to team after initial assessment? 	<p>Shared Mental Model/SBAR Notes</p> <ol style="list-style-type: none"> 1. SBAR elements? 2. Did team “receive” report? 3. New team members get report? 4. Physician gives SBAR back to team?
<p>Role Clarity</p> <ol style="list-style-type: none"> 1. Clear nursing and physician leader? 2. Other Roles clearly established? <ol style="list-style-type: none"> a. Self-assignment b. Team leader assigns roles/tasks 3. Are roles clearly verbalized to ALL team members? 	<p>Role Clarity Notes</p> <ol style="list-style-type: none"> 1. Clear nursing & physician leader? 2. Roles clearly established? 3. Roles clearly verbalized?
<p>Situational Awareness & Assertion</p> <ol style="list-style-type: none"> 1. Ongoing monitoring & crosschecking? (Assess condition & response to treatment) 2. Recognizes critical information in timely fashion i.e. “The Gorilla” 3. Effective assertion to appropriate team member? e.g. 2 challenge rule, etc. 	<p>Situational Awareness & Assertion Notes</p> <ol style="list-style-type: none"> 1. Monitoring of situation? 2. Recognizes critical information 3. Effective assertion?
<p>Closed Loop Communication</p> <ol style="list-style-type: none"> 1. Responds appropriately to input from team? (leaders open to input, rationale for actions?) 2. Readback of orders 	<p>Closed Loop Communication Notes</p> <ol style="list-style-type: none"> 1. Responds to input? 2. Readback of orders
<p>Cognitive Skills/ Medical Management</p> <ol style="list-style-type: none"> 1. Critical medical management actions (varies with each scenario) 2. Considers other diagnoses when patient doesn’t respond as expected 3. Avoids medication errors 	<p>Cognitive Skills/ Medical Management Notes</p> <ol style="list-style-type: none"> 1. Critical medical management actions? 2. Considers other diagnoses when appropriate? 3. Avoids medication errors?
<p>Psychomotor Skills/Equipment Competency</p> <ol style="list-style-type: none"> 1. Quickly locates critical equipment 2. Competent with critical equipment/systems 	<p>Psychomotor Skills/Equipment Competency Notes</p> <ol style="list-style-type: none"> 1. Locates critical equipment 2. Competent with equipment
